

July 6, 2023

Hello Neighbours,

We hope you have been well since our last communication about the Paintearth Wind Project in the spring.

The Paintearth Wind Project team has been working hard to complete the construction of the Project before the end of 2023. Since the last update letter in March, we have constructed all the access roads and approximately 66% of the collector lines have been installed. Foundation pouring at the turbine foundations is underway and expected to be completed before the end of summer. Construction of the Substation and the O&M building is also underway and on schedule.

Turbine component deliveries will begin in early July and there will be an increase in truck traffic on the roads. We will be sure to implement dust control measures appropriately as the traffic increases. Our haul routes map for turbine component deliveries is available on our website: [www.paintearthwind.com](http://www.paintearthwind.com).

Thank you for your ongoing cooperation, accommodation, and support for the Paintearth Wind Project. We look forward to hearing from you regarding any questions or concerns.

A handwritten signature in black ink, appearing to read "Silvio Martinez".

Silvio Martinez  
Construction Manager
